Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, 7, 8, 12, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 05-311271.

As to claim 1, JP 05-311271 discloses a method of continuous casting using two rolls of different temperature (abstract).

As to claim 5, the rolls are spaced at a distance (figure).

As to claim 7, the metal cast is aluminum alloy

As to claim 8, the rollers made of copper.

As to claims 12 and 13, the refractory roll (201) is heated while the roll (202) is cooled.

The heater is disposed ahead of the roll.

3. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 62-292244.

JP 62-292244 discloses continuous casting using a roll with a groove and a belt, wherein the surface temperature of both the belt and roll are different (abstract and figure).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 2-4 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP '271.

JP '271 discloses the claimed invention above, but lacks the mentioning of the rolls come into contact with the molten metal setting at melting point of the metal $\times 0.05$ or more and solidification with a depth of thickness of the cast member $\times 0.2$ or less.

Art Unit: 1725

However, the control solidification and temperature of the roll would have been obvious to an ordinary skill in the art, since these parameters are always adjusted to conform with the strand speed as the strand is being pulled downward or horizontally.

Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Len Tran whose telephone number is (571) 272-1184. The examiner can normally be reached on M-F, 8:30 - 5.
